

Kyoto Administrator's Workshop

Abstract

Title: POSTECH Bilingual Campus

Prof. Eui-Ho Suh

Chair of University Globalization Committee
Pohang University of Science and Technology

Globalization has drawn attentions from various institutions in many areas including higher education and it has played a major role in affecting administrative policies in many universities.

POSTECH has implemented the "Three Year Globalization Plan 2010-2012" since March of last year to accomplish its long-term goal of Vision 2020 which is becoming a world top 20 university by the year 2020.

Three key areas are defined by the project committee and creating a global environment for international population at the university is one of the focus areas. To execute the plan effectively, POSTECH has launched the "Bilingual Campus" which will also help the university accomplish other goals of the plan, attracting many topnotch professors and research centers around the world. Since its declaration of bilingual campus in March 2010, the university has conducted all courses and official services including administration both in Korean and English.

Through this new transformation, POSTECH will succeed in becoming a world's top university in science and technology.
