

Kyoto University ASEAN Center

WHO WE ARE

Introduction

Kyoto University is actively engaged in building global collaborative networks and promoting the advancement of world-class research and education. These activities are being supported by the establishment of three representative offices and centers in Asia and Europe.

Kyoto University has been involved in wide-ranging research and educational activities in the ASEAN region for many years. The Kyoto University ASEAN Center opened in June 2014 to support research, education, and international collaborations in the region.

By effectively integrating existing research and educational activities and networks in the ASEAN region, as well as by expanding collaborative activities with ASEAN universities and research institutions, the Kyoto University ASEAN Center aims to accelerate the promotion of research, education, and international collaborations that lead to the demonstration and development of potential in the region.

Located in Bangkok, Thailand, the ASEAN Center acts as a vital hub to cover the entire ASEAN region, and will collaborate with the Bangkok Liaison Office of Kyoto University's Center for Southeast Asian Studies, in addition to other relevant institutions. Managed by the Head of the Center, a University Research Administrator (URA), and administrative staff, the ASEAN Center also works in close cooperation with Kyoto University's International Strategy Office.
