“[Tawadas] Texte bewegen sich über kulturelle Grenzen hinweg. Japanisch-deutsche Migrationen [...] führen in kulturelle Schwellen- und Übergangszonen, wo sich vermeintlich stabile Identitäten auflösen und Fremdes sich mit Vertrautem verbindet.“

It has been 10 years since the opening ceremony of the Kyoto University European Center in Heidelberg on May 3, 2014. To celebrate its 10th anniversary, we will hold an anniversary event in Heidelberg.

Through our support of research and education, we have been committed to acting as a bridge between Kyoto and Europe, between the present and the future, and between time and space.

To symbolize this bridge, we have asked Ms. Yoko Tawada, a world-renowned writer who transcend borders and active in building bridges between Japan and Germany, to give a reading at the event. In addition we have invited three researchers from Kyoto, one lecture for the next generation that will lead to the future and two academic lectures on the theme of “symbiosis” beyond the bridge.

We look forward to seeing many visitors !
