Title of Presentation:

Recognising advancement of gender equality: representation, progression and success for all

Description of Research Interests:

(max. 150 words)

I graduated in biology from Newcastle University, followed by a PhD at Aberdeen University on behaviour in bats. I also worked in muscle physiology at St Andrews University and at the University of Bristol. In my current role I spend 80% of my time working as RSC Education Coordinator for South West England and 20% of my time coordinating Athena SWAN related activities in the School of Chemistry.
